

OFF-GRID SOLAR-POWERED LIGHTING

Model #: DGLB-OGSPL-20/AWDT

DACC's state-of-the-art, off-grid solar-powered lighting system utilizes industry-leading technology and is designed to provide lighting where the system is autonomous to the electrical grid. It comes complete with all necessary equipment for easy transportation and quick assembly. This allows installation virtually anywhere there is adequate sunlight. With minimal maintenance, each system is capable of providing continuous illumination during the evening hours.

Solar Panels

- Quantity: 2
- Panels produce enough energy to support 12 hours of continuous illumination
- Ability to charge throughout all regions of Pakistan

Battery

- Long lasting
- Battery box and terminals
- Charge controller
- Wire, cables and fuses

Pole

- Steel Foundation: 1.5' x 1.5' (0.457 x 0.457 meters)
- Pole length: 20' (6.1 meters), 10'4" and 10'3" (3.17 and 3.14 meters)
- Standard street light arm

Lamp

- Wattage: 20
- Lumens: 1,800
- Efficiency (lm/w): 90
- Lifetime: 10 years / 50,000 hours

Certifications

- Meets all applicable international/national quality standards and requirements

Warranty

- LED: 2 years
- Rechargeable batteries: 5 years
- Solar panels: 10 years

In accordance with our policy to consistently improve our products, the specifications contained herein are subject to change without notice.
